Governance (Sustainability Promotion Structure)

The Sustainability Promotion Committee was established within the NTT DOCOMO BUSINESS Group as a deliberating body to examine measures for addressing apparent and potential ESG-related social issues and to comprehensively, strategically, and precisely promote and manage sustainability activities. Chaired by the executive vice president in charge of sustainability, the

committee consists of the heads of each organization (executive officers, etc.) and the presidents of each Group company. Under the committee, we have set up the Environmental Protection Subcommittee. In addition, individual committees discuss key topics related to sustainability activities. In order to take appropriate actions in cooperation with these committees, we have established a system for promoting sustainability throughout the Group by sharing information and collaborating Groupwide.

Under this sustainability promotion structure, matters reported and discussed by each committee are shared with the Board of Directors. After deliberation, the board makes final decisions for addressing issues and determining management strategies and business plans. In addition, the board complies with recommendations from the Board of Corporate Auditors and oversees the necessary governance to promote sustainability activities strategically and appropriately.

[Sustainability Promotion Structure]

Sustainability Promotion Committee Members and Secretariat
 Chairperson: Executive vice president in charge of Sustainability

Corporate Information

Risk Management

We established the Risk Management Rules to define the fundamental elements of risk management and support sustainable corporate growth. These rules help us anticipate and prevent potential risks related to our business and minimize losses if they materialize. We also carry out necessary actions through the lead organizations responsible for the Priority Activities. As a system and mechanism for effectively addressing major risks that may affect our business management, we set up the Business Risk Management Committee, chaired by the senior executive president, to construct and implement a PDCA cycle for risk management. Processes for identifying, assessing, and managing sustainability-related risks are also integrated into this total risk management process.

We will comprehensively and appropriately promote the sustainability activities of the NTT DOCOMO BUSINESS Group, based on the implementation of proactive initiatives and management of social issues, risks, and business opportunities by each responsible organization. Furthermore, we comprehensively adjust and finalize the main initiatives, KPIs, and targets, in light of the latest domestic and international trends in ESG and our medium-term management strategy and policy. The level of achievement is verified, evaluated, summarized, and reflected in the formulation of the following year's Main Initiatives and KPIs. The Sustainability Promotion Committee also reviews the Sustainability Policy and priority issues.

Strategy

The NTT DOCOMO BUSINESS Group established the Main Initiatives under Priority Activities to address current and potential social issues, and their associated risks and business opportunities, for each of the Priority Areas of society, the environment, human resources, and governance designated by the Sustainability Policy.

We manage these activities by setting KPIs and targets for the Main Initiatives identified under each Priority Activity, ensuring that the PDCA cycle is consistently applied.

P.015 For details on the Main Initiatives, refer to the tables in "KPIs, Targets, and Outcome of Activities" in this report.

● Operating Compensation-Linked Indicators Related to Sustainability

Key sustainability indicators (greenhouse gas emissions, customer engagement rate, employee engagement rate, and new female manager appointment rate) have been set as evaluation indicators for executive compensation and bonuses for all managers, and the achievements of these indicators are reflected in their compensation.

KPIs, Targets, and Outcome of Activities

In setting KPIs for fiscal 2025, we reviewed and integrated KPIs for each priority area in accordance with the NTT DOCOMO Group's overall sustainability promotion policy, global guidelines (GRI, ISO26000, SDGs, etc.) and external evaluation indicators (DJSI, FTSE, MSCI, EcoVadis, etc.) while also considering the achievement status of fundamental items as a Group*. The following tables show the Priority Areas (society, the environment, human resources, and governance) of the Sustainability Policy, the main initiatives, key performance indicators (KPIs) and targets for fiscal 2024 for the Priority Activities, and the outcome of these activities (review, assessment, and targets) as well as the main initiatives, KPIs, and targets for fiscal 2025.

* The decrease in the number of KPIs reflects a clarification and prioritization of their scope and is not intended to relax management. Some items were removed from KPIs for reasons such as being achieved Groupwide or being integrated into external evaluation indicators.

Society

Our Vision of the Future

A better future characterized by innovation, vitality, resilience, safety, and security, in which sustainable development is achieved through value creation.

FY2024			
Main Initiatives	KPIs	Review	Assessment

Priority Activity | Promotion of DX to Connect Society with the Future

Relationship with the NTT Group

Promoting Sustainability throughout the Entire Group

NTT DOCOMO BUSINESS engages in initiatives Groupwide to address social issues as a member of the NTT DOCOMO Group and the NTT Group by adhering to the NTT Group Sustainability Charter. The NTT Group has set up the Sustainability Committee, chaired by the president, to discuss the basic strategies, status of activities, and information disclosure related to sustainability to promote its initiatives. NTT DOCOMO BUSINESS also participates in these discussions as an operating company, and decisions made by the committee are reflected in our own activities.

Furthermore, the NTT Group has been holding NTT Group Sustainability Conferences since fiscal 2013 to understand and promote sustainability activities. The NTT DOCOMO BUSINESS Group has consistently received awards at the conference since fiscal 2016. We have been proactively sharing and reporting initiatives and services that are beneficial from the perspective of sustainability, and our “Morikati: Carbon credits to protect forests” project was among those that received the Grand Prize at the 12th conference in fiscal 2024.

For more information on the NTT Group Sustainability Charter, see:

<https://group.ntt/en/newsrelease/2021/11/10/211110d.html>

For more information on Morikati, see the “Features” section in this report.

Relationship with External Entities

Participation in External Groups

NTT DOCOMO BUSINESS actively participates in external organizations and shares information so that initiatives for addressing social issues can be shared beyond corporate boundaries.

Participation in External Organizations (Major Groups Only)

- The Telecommunications Association (TTA)
- ICT-ISAC Japan
- KEIZAI DOYUKAI (Japan Association of Corporate Executives)
- The Center for Financial Industry Information Systems (FISC)
- Industrial Federation for Human Rights, Tokyo
- AI Governance Association
- Japan Climate Initiative (JCI)

Outside Advice for Management

We have an important responsibility for conducting business with due consideration to the diverse outlook of our stakeholders. With this in mind, each executive not only participates in dialogues as part of daily business but also actively takes part in internal and external meetings and individual interviews. To incorporate the perspective of sustainability into our business strategies, it is important to exchange opinions with internal and external experts and intellectuals. Accordingly, we hold dialogues between our management and outside experts as well as study sessions in which our management learns directly from them.

For dialogues, see:

<https://www.ntt.com/en/about-us/csr/dialog.html>
