Creating Value for Society and for the World

2016 CSR Report

NTT Communications Corporation
"Transform. Transcend."

By providing world-leading technologies and services, we will dramatically evolve (“Transform”) and dynamically transform the business of our clients (“Transform”), as well as society and markets. We wish to create new value that exceeds expectations and imaginations (“Transcend”) and realize a seamlessly connected world (“Transcend”).
Top Message

We will contribute to society from a global perspective to resolve social issues and achieve sustainable development.

By providing world-leading technologies and services, the NTT Communications Group will dramatically evolve (“Transform”) and dynamically transform the business of its clients, as well as society and markets. We wish to create new value that exceeds expectations and imaginations (“Transcend”) and realize a seamlessly connected world that crosses all boundaries (“Transcend”).

As the importance of ICT increases in tandem with business innovation and growth, ICT environments are likely to become more complex at corporations with the adoption of hybrid multi-cloud environments. Cybersecurity is also a major issue confronting corporate management as the number of unknown viruses increases around the world.

At the NTT Communications Group, we aim to help our clients transform their businesses (digital transformation) by taking a fine-tuned approach to assisting our clients evolve their operations and create new businesses with highly reliable and secure services and solutions based on the extensive security knowledge of the NTT Group, advanced technologies (IoT, AI, SDx) and a globally integrated ICT foundation.

In addition to accelerating the pace of our involvement, in the years ahead, we will strive to act responsibly as members of society to enable us to constantly ascertain market trends and customer needs rapidly and accurately as well as to continue providing innovative, highly reliable services. In association with these activities, we will value communications with all our stakeholders, including our customers throughout the world, and will continue working to help resolve social issues on a global scale and achieve sustainable development by initiating CSR activities worthy of a Global ICT Partner.
Business Overview

Providing global one-stop ICT services

By providing facilities with the highest level of quality in the industry and operational performance that is consistent throughout the world, we aim to be the partner of choice for customers everywhere, providing seamless global services in such areas as colocation, hosting, networks, and security.

Network Surveillance

Working in tandem with help services at overseas locations, we are constantly monitoring networks to minimize the impact on our customers’ businesses in the unlikely event of a service interruption.

Data Centers

We provide next-generation global data center services with facilities that are highly disaster-resistant. Our facilities also reduce environmental impact through the use of high-quality equipment with advanced energy-saving functionality.

Total Operations

We handle total operations for entire ICT environments (including services provided by other companies) that are compliant with ITIL*, an international standard that covers surveillance, recovery, cause investigation, countermeasure planning and change management.

Solutions at Overseas Facilities

We provide our customers with global ICT environments that are safe and secure from all threats. Our services range from overseas facility networks to LAN and server design and configuration as well as to the provision of applications.

Security Consulting

From design to installation to operation, our security consultants and engineers draw on their extensive expertise to provide highly specialized security services.

ICT Outsourcing

We act as our customers’ ICT personnel, not only configuring high-quality, safe, secure and simple ICT systems to match their needs and scale of operation but also providing the operational management of and security for those systems.

Global Cloud Vision 2016

Helping Clients Transform their Operations with Seamless ICT solutions

Our Global Cloud Vision entails contributing to our customers’ management innovations (digital transformation) through optimized ICT environments based on seamless ICT solutions.

Details of Global Cloud Vision 2016

With a “new promise” to ourselves, we will advance global CSR activities across the Group.

In June 2016, the NTT Communications Group created a new Fundamental CSR Policy. We aim to thoroughly implement this new policy as our “promise to society” shared by the entire Group.

Contributions to Society
We shall contribute to the resolution of social issues in Japan and overseas through the development and provision of innovative ICT, while providing highly reliable services for the sustained development of society.

As a group of companies that provides key infrastructure that supports society and protects our lifestyles, we shall provide secure environments for communications that are fortified against cybersecurity threats and resilient to natural disasters.

Contributions to the Global Environment
We shall endeavor to solve environmental problems on a global scale through initiatives to use ICT to reduce the impact of society on the environment, while lightening the environmental burden of our business activities as a Group.

Respect for Human Resources
We shall create work environments that invigorate each and every employee, while respecting the diversity of our employees and other stakeholders. Moreover, we shall contribute to the creation of an abundant society by changing ourselves for the better and seeking to break free from our own limitations.

Continuous Strengthening of Corporate Governance
While valuing opportunities to communicate with all our stakeholders, we shall contribute to the sustainable development of society by engaging in business with high ethical standards and respect for human rights.
Materiality of NTT Communications Group

We continue to take on various challenges every day to fulfill the expectations placed on us by society.

Amid changes in the economic and social fabric, the expectations of society continue to evolve, constantly challenging us to raise the medium-term targets for our CSR activities. From 2015 to 2016, we reassessed key issues (materiality) with input from external experts. Based on the outcome of this assessment, we updated priority areas and activities based on our fundamental CSR policy, and are now pushing forward with initiatives.

<table>

For more details about our reassessment of materiality and the update to our CSR Priority Areas, see the expanded version of the CSR Report 2016.
Engagement with Stakeholders

Aiming for a better society by engaging with each and every stakeholder

We believe a cornerstone of CSR is having all employees take into consideration dialogue with stakeholders in their daily business activities. We take a flexible approach to creating opportunities for talking about various topics in a bid to realize a sustainable society.

Stance on Consideration for Stakeholders

For Customers
1. From a customer-first perspective, we will provide solutions and services that offer true value.
2. We will act responsibly and with pride as a member of the NTT Communications Group in responding quickly, flexibly, and with integrity to our customers.
3. We will establish enduring relationships of trust with our customers.

Main Communication Channels

1. Voice of Customer (VOC) Survey
2. NTT Communications Forum

For Business Partners
1. We will maximize our cooperation with partners in order to offer the best possible value for our customers.

Main Communication Channels

1. Arcstar Carrier Forum (ACF)
2. Customer Council
3. Partner Summit
4. Ongoing communication with suppliers

For Society
1. By providing more secure and innovative Internet services, we will contribute to the sound growth of the Internet society.
2. As part of our strong connection with society, we will contribute to global environmental protection.
3. We will understand and respect the cultures and customs of different nations and regions.

Main Communication Channels

1. Dialogue with stakeholders
2. Various social contribution activities
3. Explain products through customer service channels
4. Distribute information to society via content and services

For Competitors
1. We will abide by rules and compete fairly.

Main Communication Channels

1. Exchange of opinions at industry organizations
2. Collaborate with outside institutions and on industry-government-academic projects

For Employees and the Workplace
1. We will recognize individuality and diversity and mutually protect human rights.
2. We will trust and respect each other and create an environment that is conducive to personal development and fulfillment of our goals.
3. As an ICT company, we will make a maximum effort to protect security.

Main Communication Channels

1. Dialogue with the president
2. KAZEN Support Line
3. Exchange of opinions with management via intranet

For Shareholders
1. We will disclose information concerning our business performance in a fair, accurate, and timely manner.
2. We will achieve sustainable growth as a company and seek higher benefits for our shareholders.

Main Communication Channels

1. NTT Group Management Conference
2. NTT Group CSR Manager Meeting
Helping more people around the world connect seamlessly with ICT in their daily lives

ICT has been advancing, especially for the Internet of Things (IoT). We are taking on the challenge of moving society forward to one where people around the world can effortlessly benefit from ICT through reliable services.
New ICT is being created every day, and the paradigm of economic activity is constantly evolving. In our daily business activities across the NTT Communications Group, we focus on helping solve social issues by providing society and our customers with cutting-edge technologies while creating highly dependable, high-quality communications infrastructure.

Moreover, we are constantly reassessing our contributions to society through ICT. By taking a multi-faceted approach in our core initiatives, we aim to help create a better future while prospering in unison with various communities throughout society.

**Expansion of New IoT Solutions with Cutting-Edge Technology**

In August 2015, NTT Communications established the IOT Tasforce to accelerate the development of services that use IoT. We will steadily enhance our lineup to provide more customers with IoT Platform Services that facilitate the use of various IoT for visualizing production processes at manufacturers, monitoring the state of devices, and managing vehicle fleets. For example, Vehicle Manager is a service that improves the management of marketing vehicle fleets. Automotive devices with communications functions connect to the cloud to relay daily reports on driving activity and patterns for analysis, which can be viewed and managed on the web to ensure safe driving practices and eco-friendly driving patterns.

Moreover, we are turning our own office buildings into digital hubs with IoT platforms, allowing the automation of equipment inspection work without having to patrol the premises. By taking steps to change our own practices, we have accumulated technology and knowledge that will help solve social problems.

**Commencement of Arcstar Network Services in India**

In India, expectations have risen for high-quality network services. In order to cover the vast country, NTT Communications India Pvt Ltd. obtained a National Long Distance (NLD) telecommunications license in India in the belief that it is essential to provide one-stop management across multiple carriers. The company developed the Arcstar domestic network service and began providing the service in December 2015.

In India, government agencies place a diverse array of requirements on telecommunications companies, creating hurdles for telecommunications providers to clear for providing comprehensive solutions that include networks, data centers and security monitoring. By bringing together the expertise of NTT Communications and the global management resources of Group companies, NTT Communications India Pvt Ltd. has been able to provide total ICT solutions. Through these services, we are able to provide high-quality network services to our corporate clients that conduct business in India.
Global Warming Continues Unabated

Society needs to create a framework for quickly reducing carbon and moving away from carbon

According to estimates by the Meteorological Agency of Japan, the average annual temperature of the world has steadily risen since the 1900s, and the temperature of the planet today is its warmest ever over the past 1,400 years. Unless changes are made, the temperature of the planet is expected to continue increasing, posing a greater risk of food and water shortages, more frequent weather anomalies, and health problems for the human population.

In order to mitigate and avoid these negative effects on future society, the environment and economy, we must strive to reduce and eventually eliminate carbon emissions in society.
The reduction of CO₂ emissions has been hailed as a necessary means of addressing abnormal weather patterns around the world and to combat global warming. However, not enough has been done. With pressing needs to do more, we at the NTT Communications Group are moving proactively to deploy low-carbon technologies as a provider of services that utilize ICT equipment.

In order to leave future generations an abundant global environment, such as by promoting a closed-loop economy and biodiversity, NTT Communications is aggressively implementing a multitude of initiatives while fulfilling its responsibilities as a leading global ICT company.

**Business-Linked Initiative to Protect Coral Reefs**

As a leader in media services, NTT Plala, Inc. has taken action to protect coral reefs, which play a vital role in the ecosystem of our oceans, by enlisting the help of its six million members. Specifically, NTT Plala, Inc. offers tours of coral grafting to members of its Bukatsu DOI service, an online community for adults. Participants in the tour experience coral grafting with employees. In addition, NTT Plala, Inc. produces and distributes 4K videos about the state of coral reefs and activities to protect them, creating opportunities for people to think more about protecting coral reefs. In January 2016, we began donating a portion of proceeds from people who watched the video for initiatives to protect coral reefs, as a part of our aim to preserve biodiversity, a key aspect of our Green ICT Vision 2020.

NTT Plala, Inc. will continue to protect the environment with help from its members by providing enjoyable projects linked with its business activities.

**Promoting Green Energy Use in Japan and Overseas**

As a global ICT corporate group, one of our responsibilities is to promote the use of green energy around the world. In order to curb emissions of CO₂ and realize a low-carbon society, companies are expected to more proactively use green energy, but this must be implemented with due consideration paid to the unique traits of each local community and regional climates. From this standpoint, we have installed solar panels on top of our data centers in Tokyo, Singapore and Malaysia, solar water heating systems at our data center in Hong Kong, and wind turbines at our data centers in India and office buildings in Thailand. In these and other ways, we have advanced the use of diverse renewable energy sources.

The generated electricity is used to light common areas. In fiscal 2015, the amount of renewable electricity generated in Japan was equivalent to saving 128,405kg-CO₂, the amount of CO₂ absorbed by a forest of 9,171 Japanese cedar trees in one year.
 Respect for Human Resources

A business where everyone is respected and employees can be themselves

The diversification of the workforce has accelerated due to diverse issues, such as declining birthrates and aging populations in advanced countries, and explosive population growth in emerging countries. We strive to operate businesses where diversity is respected and utilized with respect to gender, nationality and physical traits.

Our Goals

A society where everyone acknowledges and lifts each other higher

- A society where diversity is respected in terms of individuality, attributes and ideology
- A society where people can use their abilities to the fullest

Japan, a Country Where Women Can Fulfill Their Ambitions

Female workforce participation rate is still lower than other advanced countries

Create a foundation that promotes women in the workplace via public-private initiatives

Promoting female participation in the workforce is a key topic in respect for diversity. Countries around the world have endeavored to promote women for decades. Disappointingly, Japan has lagged in this regard. According to the 2016 White Paper on Gender Equality in Japan, Japan has the lowest ratio of women in the overall workforce and management positions among advanced countries. As a consequence, the public and private sectors in Japan have advanced measures to improve this situation, such as by enacting the Act of Promotion of Women’s Participation and Advancement in the Workplace* in 2016.

*Official name: Act of Promotion of Women’s Participation and Advancement in the Workplace

Women as a percentage of the workforce and management positions

Source: 2016 White Paper on Gender Equality
Employees carry out the responsibilities of companies and are the stakeholder who is closest to the daily operations of companies. At the NTT Communications Group, we seek to foster a mutually beneficial, sustainable relationship with our employees, and have created measures to nurture talented employees with a keen awareness of globalization.

Over the past few years, attention worldwide has focused on diversity in management as more emphasis is placed on supporting the health of employees and converting diversity into a competitive advantage. As more women join the workforce and new workstyles are adopted, NTT Communications is trying out various new measures including the exchange of personnel around the world.

Highest “Eruboshi” certification obtained based on the Act of Promotion of Women’s Participation and Advancement in the Workplace

In May 2016, NTT Communications received the highest certification among the certifications bestowed by the Minister of Health, Labour and Welfare based on the Act of Promotion of Women’s Participation and Advancement in the Workplace (the Women’s Participation Promotion Act). Of the companies that have created and submitted action plans based on the Women’s Participation Promotion Act, this certification recognizes companies that have put in place the best measures for promoting the advancement of women in the workplace. Certified companies are allowed to use the “Eruboshi” certification mark.

NTT Communications has taken steps that will allow its diverse employees to adopt different workstyles and lifestyles with the aim of creating a corporate culture that empowers its employees. These steps include updating various support systems, such as for child rearing and nursing care, as well as reforms to workplaces with the use of ICT for working remotely. As a result of these initiatives, NTT Communications received the certification with high marks in all categories, including the ratio of female employees, the ratio of women returning to work after leave, and the ratio of women in management positions.

New Diversity Management Selection 100 award received from Ministry of Economy, Trade and Industry

In March 2016, NTT Communications was selected by the Ministry of Economy, Trade and Industry to receive the New Diversity Management Selection 100 award. The Diversity Management Selection 100 award is given by the Minister of Economy, Trade and Industry to companies that have improved corporate value through diversity management. The New Diversity Management Selection 100 award was created in fiscal 2015.

Ever since we established the Diversity Promotion Office in 2008, NTT Communications has endeavored to foster a corporate culture that allows employees with diverse backgrounds to work to their best ability, regardless of gender, age, birthplace, nationality, religion or disability. Moreover, in recent years, we have moved aggressively to introduce a companywide workflow management system, standardize service operations across the globe, promote an employee dispatch program to overseas affiliates, and hire people of foreign nationality amid the globalization of our operations. These multi-faceted initiatives around the world also contributed to our receiving of this award.

Diverse employees work together as one team
We place emphasis on respect for one another and helping each other in the workplace.
Continuous Strengthening of Corporate Governance

Our mission is to always be trusted

The responsibilities that NTT Communications are expected to fulfill have been broadening and deepening amid the move toward borderless economies and spread of ICT in society. As a corporate group responsible for ICT infrastructure, NTT Communications will continue to strengthen its business foundation based on trust while strictly complying with laws and regulations.

Improving Security, an Unending Obligation of ICT Companies

Building out a precise protection and countermeasure system for constantly evolving security threats

As ICT advances and becomes more important as social infrastructure, the severity of cybercrime that sneaks through cracks in security has been on the rise. This increase in the severity of cybercrime is mirrored in the list of the 10 biggest threats kept up to date by the Information Technology Promotion Agency.

Our ICT service companies include companies that handle sensitive information for customers and society. Our fundamental duty is to vigilantly ensure information security on a daily basis. To this end, we must advance and maintain systems that prevent and thwart cyberattacks on a daily basis.

Source: Information Technology Promotion Agency’s Ten Biggest Information Security Threats in 2015
As we continue to provide ICT services embedded in social infrastructure throughout the world, our management foundation must be able to operate as an efficient and nimble business organization with an open corporate culture and risk management systems able to seamlessly address rare events, such as accidents and natural disasters. At the NTT Communications Group, we take a thorough approach to ensuring compliance and efficient governance in order to continue contributing to the development of a sustainable society.

In recent years, cybercrime has become a serious social problem, and we have been working diligently to prevent and thwart cybercrime.

Creating a framework for countering threats, centered on NTT Com-SIRT, our information security organization

In recent years, there has been an increase in information security threats such as cyberattacks that have taken servers offline and intruders stealing data. Every day, previously unknown threats are discovered, and the damage from these threats has become more severe. An increasing number of companies have set up CSIRTs*, a team dedicated to responding to security incidents in emergency situations.

At NTT Communications, our customers trust us with their information and network operations. In October 2015, NTT Communications established the Information Security Division as a new organization for managing information security, and launched its CSIRT team “NTT Com-SIRT”. This team is charged with responding to and dealing with security incidents related to systems and networks across the entire NTT Communications Group, and aims to reinforce security management by advancing measures (including sweeping measures) to prevent a reoccurrence.

* Computer Security Incident Response Team

Participation in public-private initiative for testing and training comprehensive defense models against cyberattacks

To address the increase in cyberattacks, NTT Communications has participated in the actual testing and training of comprehensive defense models against cyberattacks with the Ministry of Internal Affairs and Communications since fiscal 2013. This endeavor analyzes attacks and verifies the effectiveness of defense models with the aim of creating systems able to respond to new cyberattacks. The public-private project provides practical training on defenses against cyberattacks.

NTT Communications is in charge of evaluating the effectiveness of defense models, from detecting and countering cyberattacks (prevention and response measures) to forming an incident response. The knowledge gained from these experiments is reflected in actual CYDER* exercises.

The objective of these exercises is to improve security incident responsiveness, namely the early detection and identification of increasingly sophisticated cyberattacks. At the same time, we support close-knit collaboration between the public and private sectors to reinforce the defensive posture of information infrastructure underlying society.

* Cyber Defense Exercise with Recurrence
## CSR Activity Achievements

We introduce the main activities in fiscal 2015 aligned with the Group’s CSR priority areas. For more details, please read the expanded version of the 2016 report.

The CSR website is updated with the latest information on a regular basis. Here can be found information on the CSR activities at each NTT Communications Group company.

**CSR Report Website**

This website provides a comprehensive presentation of the content of the NTT Communications Group CSR Report 2016. This report comprises two parts: a highlight version and an expanded version. We aim to provide information effectively by taking into consideration those readers envisioned for each medium. As can be expected of a company that provides ICT services, the NTT Communications’ CSR Report has been provided in electronic format since 2012.

The highlight version presents the NTT Communications Group’s more important CSR activities in a clear, straightforward manner to the general public.

The expanded version presents numerous examples of the NTT Communications Group’s CSR activities, through a comprehensive look at specific CSR activities and detailed data.

- **Period Covered**
  Fiscal 2015: April 1, 2015 to March 31, 2016
  (Some content may fall outside this time frame.)
