Society expects companies to fulfill a wide range of responsibilities, from providing new value through products and services to maintaining a corporate culture of integrity and fairness. We will always place compliance at the foundation of our operations as a trusted corporate group.

To achieve sustainable corporate growth and continuously contribute to realizing a sustainable future, we are committed to practicing efficient governance and solid compliance across the Group. In particular, as advances in the remote world have heightened the importance of ensuring information security as a social concern, we have been actively preventing problems and providing countermeasures. We will remain faithful to our corporate mission, core beliefs, and policies in order to ensure each and every employee takes action with a sense of responsibility and strive to establish corporate governance and compliance systems throughout the Group to construct an efficient, legally compliant, and ethical management foundation.

Up to the present and into the future, we will endeavor to realize solid governance and enhance corporate value as we continue to advance as a company that has earned the public’s trust.
Under the NTT Group Corporate Ethics Policy, NTT Communications will not only adhere to laws and ordinances but will also engage in its daily operations with high ethical standards as a corporate group that retains the trust of all stakeholders, including customers, business partners, shareholders, and society as a whole. We have been developing our compliance promotion framework in accordance with our Global Compliance Regulations, through measures such as establishing a Compliance Committee and assigning compliance promotion leaders and staff to each unit and Group company. At the same time, we consistently promote compliance management across the NTT Communications Group by disseminating top management messages, educating and training employees, and operating points of contact for internal reporting.

We also prepare against various business risks, including large-scale disasters, by establishing systems and mechanisms that enable us to effectively respond to risks in our business operations. This is done under the leadership of the Business Risk Management Committee and involves annually reviewing and revising risk identification, response policies, and countermeasures. In addition to improving Groupwide risk sensitivity and handling the risks that have materialized, these activities are intended to build a system for addressing environmental and social risks in the future through a concerted Group effort.

As part of our ongoing compliance efforts, we are fostering awareness of risk management and conducting compliance training, with attendance rising to 98.9% in fiscal 2021 from 93.1% in fiscal 2020, while the implementation rate for the corporate ethics survey rose to 94.1% from 83.8% in fiscal 2020. We also conducted training for reviewing management to prevent harassment. We will continue to work on establishing a compliance foundation with integrity to promote harmony and mutual understanding among employees and adapt to the new structure and processes.

In addition, we are striving Companywide to continuously enhance our risk management system. In fiscal 2021, the Business Risk Management Committee met twice and Business Risk Management Subcommittee meetings were held 12 times. We have also designated the COVID-19 pandemic, information security, and resilience as material risks that require a focused effort.

Our mission expresses the purpose of our business while also reflecting our stance of generating innovative businesses to realize a world in which the inherent strengths and qualities of individuals, organizations, and societies are demonstrated to maximum effect.

Our core beliefs embody the values that all of us should uphold in meeting our mission, with the underlying intention of creating value that exceeds society’s expectations by exercising individual initiative. These represent the cornerstone for management and individual employees as all of us think and act at our own initiative to accomplish our mission of creating innovative and unprecedented communication methods and new value for the future.

We can advance toward achieving our goals by sharing and broadly establishing our mission and core beliefs, which are the result of a united effort drawing upon repeated discussions by employees, the president, and members of management. At times,
we may become uncertain about the decisions and actions that meet the needs of stakeholders in our relationship with them. Whenever this concern arises, we will reflect on our proper course of action as a company serving society by returning to business activities based on our mission and core beliefs. Through these actions, we will strive to become a trusted company that satisfies the needs of customers and society.

In addition, the NTT Communications Group is upholding its new medium-term business vision of Re-connect X to fulfill its corporate mission in the “new normal” society that has been forced to undergo rapid change due to the spread of the COVID-19 pandemic. As a general variable, “X” can signify anything. Together with our customers and partners, we will strive to help bring about a sustainable future by safely and securely connecting and re-connecting everything, by collecting, storing and analyzing data, and providing feedback.

We believe that maintaining our business activities based on our mission, core beliefs, and business vision in a lawful, fair, and ethical manner contributes to meeting the SDG 10 “Reduced Inequalities” and SDG 16 “Peace, Justice and Strong Institutions.”

For more information on our mission, core beliefs, and business vision, see: https://www.ntt.com/about-us/we-are-innovative/vision.html?link_id=ostp_mdd_about

For more information on Re-connect X, see: https://www.ntt.com/en/about-us/re-connectx.html

Corporate Governance Structure

NTT Communications has adopted a governance structure based on a system of Board of Directors and Board of Corporate Auditors and has recently assigned outside directors to bolster its governance functions. The board comprises seven members and is chaired by the president. In principle, it meets once a month to make key management decisions in compliance with laws and regulations, the Articles of Incorporation, and the Board of Directors’ rules.

We have set up an Internal Audit Department at the head office to conduct annual internal audits by selecting audit items based on the results of risk assessment to minimize or prevent management risks and boost corporate value. The Board of Corporate Auditors comprises three auditors. In addition to attending important meetings such as those of the Board of Directors, they hold meetings of the Board of Corporate Auditors to audit the execution of directors’ duties with an emphasis on confirming the legality and appropriateness of management decisions. A dedicated organization and staff facilitate efficient audit operations. The corporate auditors conduct their audits in close cooperation with accounting firms and the Internal Audit Department by periodically sharing information on audit plans and results.
Appointing Directors

Directors are appointed with the expectation that they will utilize their extensive knowledge and insight in their respective fields.

### Composition of Board Directors and Auditors (as of December 1, 2022)

### Thorough Compliance

#### Compliance Promotion Framework

The NTT Communications Group acts in accordance with the NTT Group Corporate Ethics Policy, established by Nippon Telegraph and Telephone Corporation and applied throughout the NTT Group. To address compliance issues in Japan and overseas that have become increasingly complex in nature, NTT Communications will not only adhere to laws and ordinances but will also engage in its daily operations with high ethical standards as a corporate group that retains the trust of all stakeholders, including customers, business partners, shareholders, and society as a whole.

Specifically, we have established the relevant rules centered on the Global Compliance Regulations that serve as the standard compliance policy for the NTT Communications Group. We also promote compliance under a framework led by the Compliance Committee, which is by a senior executive vice president and supervises compliance promotion leaders and staff assigned to each unit and Group company. Under this framework, we consistently promote compliance management across the NTT Communications Group by disseminating top management messages on compliance, training employees, operating points of contact for internal reporting, and conducting internal audits to confirm and improve the ongoing initiatives at each Group company.

The Compliance Committee consists of compliance promotion leaders (heads of each unit) of NTT Communications and presidents of each Group company and meets regularly every six months to provide a forum for sharing the status of reporting at internal points of contact and holding discussions on measures for establishing corporate ethics. The committee reports on the content of its discussions for each fiscal year to the Executive Council and Board of Directors of NTT Communications.
Looking ahead, even as we respond to regulatory changes in Japan and overseas and the evolving business environment, management and all Group employees will engage in ethical business practices and seek to strengthen the Group’s compliance system worldwide.

For more information on the NTT Group Corporate Ethics Policy, see: https://group.ntt/en/csr/governance/compliance.html

**Awareness-raising Programs and Training for Thorough Compliance**

To ensure thorough legal compliance and fair business activities, companies are required to implement ongoing awareness and training programs for employees and directors. The NTT Communications Group is actively pursuing internal awareness-raising activities through various programs including compliance training, and by conducting employee awareness surveys on corporate ethics, inviting entries for compliance slogans, and regularly providing information via the internal website.

Every year, we provide compliance training for all employees and directors. In fiscal 2021, we covered basic themes related to legal compliance in Japan and overseas, such as anti-monopoly laws and the prevention of bribery, including overseas cases, and insider trading. We also organized additional training on specific themes such as the appropriate handling of customer information and confidential internal information, from the standpoint of information security, and establishment of discipline premised on new workstyles such as remote work. Attendance for the NTT Communications Group as a whole was 98.8%.

We are continuing training in fiscal 2022 on themes that address changes in social and economic conditions, such as management of personal information, key considerations for conducting remote work, prevention of harassment, and sincere dealings with stakeholders. By enhancing content and increasing attendance, we are working to strengthen compliance management across the Group.

We also believe it is important to establish integrity as the key to raising awareness of compliance and realizing compliance management. In fiscal 2021, we conducted training on integrity for all employees and compliance promotion staff in each organization and focused on establishing integrity at both the personal and organizational levels.

In light of the increasing importance of supply chain compliance, including enforcing legal compliance among subcontractors, we include a clause seeking compliance with guidelines such as the NTT Communications Corporation Guidelines for Sustainability in Supply Chain in our subcontracting agreements as part of an ongoing effort to ensure compliance across our operations, including the supply chain.

For more information on our procurement activities, see: https://www.ntt.com/en/about-us/procurement.html

**Initiatives for Preventing Corruption**

To ensure compliance with the prevailing laws and regulations in Japan and overseas on preventing corruption, including bribery and bid-rigging, NTT Communications adheres to the Anti-Bribery Handbook compiled by its parent company Nippon Telegraph and Telephone Corporation, as well as its own internal rules, to prevent corruption.

We have stipulated detailed rules against bribery as well as prevention guidelines under the Global Compliance Regulations to clearly demonstrate we have proper measures in place to combat this concern, and we are determined to stringently address specific acts of bribery such as facilitation payments.

As part of our Groupwide effort to prevent corruption, we follow procedures in various countries with regard to prior approval in cases where providing benefits to public officials are tolerated under law and examine the eligibility of agents and consultants hired to execute our operations. We also include prevention of corruption as a topic in our compliance training in an ongoing effort to raise awareness.

In August 2021, we established rules on entertaining outside the Company under the Global Compliance Regulations and began applying them to practical situations to ensure that employees of NTT Communications Group companies will engage in highly ethical conduct when entertaining outside stakeholders, including public officials. Through these rules, we seek to ensure fairness in operating our business and earn shareholder trust.
Initiatives on AI Ethics

Accompanying the rapid progress in technology, AI has spread through incorporation into products and service functions, while concrete applications of AI are being promoted in various areas. On the other hand, ethical concerns over AI-based evaluation and judgment, such as the potential for discrimination and prejudice, have also materialized. In view of our pursuit of businesses such as Smart World and B2B2X, we formulated the NTT Communications Group Basic Policy on AI in April 2021 with the objective of ensuring the sound and reliable use of AI founded on an understanding of its possibilities and inherent risks, and we began applying the policy to manage service development and other processes.

For more information on the NTT Communications Group Basic Policy on AI, see: 
(in Japanese only)

Consultation Hotline

The NTT Group has established a common external contact point for consultation and reporting operated by a law firm for all Group companies. The NTT Communications Group has also set up its own hotline for reporting and consulting on compliance issues and a contact point for consulting on human rights issues. We are fostering an open corporate culture by creating an environment that encourages employees to seek consultation and by swiftly and appropriately responding to their concerns and reports.

In fiscal 2021, a total of 52* incidents related to the NTT Communications Group (30 related to harassment, 27 to dissatisfaction in the workplace, 2 to labor, and 7 others based on a broad categorization) were reported through the channels described above. The Compliance Office responded appropriately to the reports after investigating the facts and implemented the necessary actions to prevent recurrence.

The contact points are being operated in accordance with internal rules such as the Global Compliance Regulations, which stipulate the ability to submit reports anonymously, the necessary measures that will be implemented to ensure that whistleblowers are not treated unfairly as a result of filing a report, and that those involved in an investigation will be bound by confidentiality with regard to information contained in the report.

Following the enforcement of Japan's revised Whistleblower Protection Act in June 2022, we have been reviewing and improving our internal rules and regulations to make the hotline even more accessible for reporting and consultation.

*The total figure does not add up because a single report may include several incidents.

For more information on the external contact point for the NTT Group Corporate Ethics Helpline, see: 

Risk Management

The basic elements of risk management are defined in the Risk Management Rules we established to achieve sustainable corporate growth by anticipating and preventing the occurrence of potential risks that exist in and around our business and by minimizing any loss in the event they materialize.
mechanism for effectively addressing major risks that may affect our business management, we set up the Business Risk Management Committee, chaired by the senior executive president, to construct and implement a PDCA cycle for risk management.

The heads of units and presidents of Group companies comprising the Business Risk Management Committee meet twice a year to address the changing business environment by defining risks that require action, identifying material risks, and discussing issues such as initiatives for promoting risk management. In fiscal 2022, the committee focused on the current status of internal and external risks as well as their impact and scope to identify 19 items, including risks related to environmental issues, responsibility for human rights, information security, governance, supply chain, human resources, compliance, business resilience, and pandemics. The risk items were also assessed according to their assumed frequency of occurrence and impact. As a result, the COVID-19 pandemic and information security were identified as material risks for the second consecutive fiscal year. Furthermore, in addition to taking countermeasures against the growing number of natural disasters, resilience was selected as a new material risk in response to the need to address a decentralized society and the expanded business domains following reorganization into the new DOCOMO Group, and measures for risk management were reinforced accordingly. Each risk item, including material risks, is handled by a Business Risk Management Subcommittee consisting of the relevant units that meet each month to implement a practical PDCA cycle for risk management by examining and analyzing the occurrence of risks and discussing countermeasures. Operational audits are conducted to confirm the status of each unit’s measures against risk, and similar activities are extended to principal Group companies in Japan to promote risk management throughout the Group.

Crisis Management

Since the Great East Japan Earthquake, we have seen growing public interest in crisis management for times of emergency, such as large-scale natural disasters. With a renewed awareness of our mission as a company responsible for maintaining social infrastructure through communication, we have strengthened our management structure to accelerate our response to contingencies and have sought to instill that awareness in all departments by ensuring strict adherence to manuals and organizing drills. In the event that a material risk occurs, we will set up a Disaster (Accident)/Risk Response Headquarters, headed by the president or senior executive president, as needed in order to provide the structure for gathering accurate information and making effective decisions. Thereafter the Disaster Response Headquarters will take the lead in addressing the situation on the ground. In July 2021, we established the Supply Chain BCP Guidelines to strengthen business continuity across the entire supply chain. We are working to ensure stable procurement with the cooperation of our suppliers. Since fiscal 2013, we have laid out an operational plan to prepare against a pandemic in compliance with the Act on Special Measures for Preparedness and Response against Pandemic Influenza and New Infectious Diseases, and we are currently formulating a related concrete business continuity plan. In response to the COVID-19 pandemic, we have taken the following measures.

• Set up a Disaster Response Headquarters headed by the president
• Established our operational policy based on guidelines published by the Telecommunications Carriers Association and other entities
• In line with our responsibilities as a designated public institution, we sought to secure telecommunications through operations such as monitoring networks, repairing equipment, and opening communication lines. We also sought to protect people’s lives and health by taking appropriate actions against infection. Furthermore, to comply with Japan’s Disaster Countermeasures Basic Act and Act on Measures for Protecting Japanese Nationals in Armed Attack and Other Situations, we have established and publicly disclosed our Operational Plan for Disaster Prevention and Operational Plan for the Protection of Japanese Nationals in order to fulfill our responsibility as a designated public institution.

For more information on NTT Communications’ initiatives against disaster, see: https://www.ntt.com/about-us/cs/saitai.html (in Japanese only)
1. In maintaining a system of internal controls for complying with laws and regulations, managing any risk from losses and carrying out proper and efficient business operations, NTT Communications takes a variety of measures to prevent and minimize loss.

2. NTT Communications has established the Legal and Internal Audit Department to maintain and assess effectiveness with regard to operational status of the above system of internal controls. As a monitoring organization, the department is responsible for regular audits and special audits of high-risk areas common to the NTT Group, in keeping with the standardized auditing criteria of NTT. The necessary improvements are made following assessments of system effectiveness.

3. NTT Communications will cooperate with NTT DOCOMO, INC. and take appropriate measures to ensure the reliability of its system of internal controls for financial reporting under Japan’s Financial Instruments and Exchange Law.

4. The president is responsible for ensuring the development and implementation of the system of internal controls. We will take all necessary steps to comply with NTT DOCOMO, INC.’s Basic Policies Concerning the Maintenance of Internal Control Systems.

5. We will pursue data analysis-based auditing methods that can detect risks based on abnormal values and trends through big data analysis, thereby contributing to further strengthening internal controls for the NTT Communications Group as a whole.

*1 Agile auditing is a method that places greater focus on risk and by which audits are conducted within a short period so that advice and reporting can be provided on a near-real-time basis.

*2 Computer-assisted audit techniques is an auditing method centered on big data analysis.
We will manage the entire supply chain with high ethical standards by promoting and strengthening the sustainability of NTT Communications Group suppliers to ensure a reliable procurement system for our customers. To that end, we established NTT Communications Corporation Guidelines for Sustainability in Supply Chain and focus on developing mutual understanding and relationships of trust with our suppliers. At the same time, we are developing a procurement system based on the concept of sustainable procurement, which extends beyond environmental issues, with thorough consideration of humanitarian and social issues as well. We will strive to enhance our partnerships to properly understand and address the impact of our business activities on the value chain and engage in a dialogue with our stakeholders to meet the various requests and expectations from society, toward operating business on the trust of our stakeholders.

With the basic ideas of the previous Guidelines for CSR in Supply Chain, the new guidelines clarify the positioning of our requests to suppliers (code of conduct). The guidelines as a whole now require stronger cooperation, such as requesting primary suppliers to take responsibility for seeking compliance from upstream suppliers, establishing management systems to comply with each guideline, and taking actions such as suspending business with suppliers who do not correct violations. The content of each specific item has also been enhanced.

### Procurement Policies

1. NTT will strive to provide competitive opportunities with fairness to both domestic and foreign suppliers, and to build mutual trust and understanding.
2. NTT will conduct economically rational procurement of competitive goods and services that meet its business needs, deciding suppliers based on quality, price, delivery times and other critical issues, in compliance with laws and social norms.

### Priority Activities

In order to realize the sustainable procurement concept, we will thoroughly promote the procurement of products with minimal impact on the environment by conducting product assessments with the cooperation of suppliers. Also, we will encourage the widespread adoption of supply chains that do not engage in the trade of conflict minerals or in any way intensify social and humanitarian problems. Under this concept, we continue to have suppliers complete sustainable procurement promotion surveys, which began in fiscal 2016, and also strive to identify the related risks. Moreover, we are focused on more clearly stating our accountability to companies with consideration for NTT Communications as a supplier.

We have been providing supplier information to EcoVadis**, an international sustainability rating organization. In fiscal 2022, we will continue to build on the supplier surveys while simultaneously taking steps to promote the exchange of opinions with suppliers and increase information disclosure.

Furthermore, we are engaged in multifaceted activities with a primary focus on continuous customer satisfaction surveys as our main measure for continuously improving customer satisfaction. In fiscal 2020, we revised the methodology of our voice of customer (VOC) survey. The process enabled us to respond to survey results by identifying priority issues from the customer perspective and quickly improving these issues, which we continued to do in fiscal 2021.

In our customer satisfaction survey on our services, we standardized the wording of the questions, which enabled us to conduct a trend analysis across all our services and identify issues that could not be discovered in a standalone survey covering a single service. This led to the implementation of measures related to the business portal**.

In fiscal 2022, we intend to improve our sales activities and service development by conducting surveys to understand customer expectations for “docomo business,” the corporate business brand of the new DOCOMO Group, and what customers who are engaged in rebuilding local communities require from ICT providers.

*1 An organization that evaluates supply chain sustainability. Providing platforms for evaluating the sustainability of companies related to policy measures, and achievements, EcoVadis conducts surveys and evaluations of suppliers in 175 countries and 200 industries from the perspective of four areas: the environment, labor conditions, business activities, and the supply chain.
*2 A free portal site that allows centralized management and operation of corporate services provided by NTT Communications, such as Arcstar Universal One, Arcstar IP Voice, and the Smart Data Platform.

**Collaboration with Suppliers**

**Dissemination of Sustainable and Green Procurement**

- **Promoting Sustainable Procurement**
  We have formulated the NTT Communications Corporation Guidelines for Sustainability in Supply Chain, which encourage procurement policies for respecting human rights and protecting the environment, ensure the quality and safety of products and services, and recognize the overall needs of society. When selecting and entering into agreements with new business partners, we have designated our own sustainability compliance items, in addition to credit screening criteria, which include confirming corporate initiatives on human rights and labor issues. When we determine that a company has failed to meet our criteria and thus represents a risk, we do not trade with them.

  To promote sustainable procurement, we conduct a survey that targets suppliers designated by Nippon Telegraph and Telephone Corporation (NTT) from among 140 major suppliers to the NTT Group, to confirm the management status of the Guidelines for Sustainability in Supply Chain. After the compiled results are analyzed, we consider means of improvement for dealing with high risk concerns. In fiscal 2021, we received responses from all 15 companies and found no high-risk issues. We also engaged in dialogue with five suppliers that are engaged in rebuilding local communities with the cooperation of suppliers in 175 countries and 200 industries from the perspective of four areas: the environment, labor conditions, business activities, and the supply chain. When we determine that a company has failed to meet our criteria and thus represents a risk, we do not trade with them.

begin incorporating EcoVadis surveys and evaluations into our questionnaire surveys to conduct higher quality evaluations. Looking ahead, we will continue to work with our suppliers to promote sustainable procurement.

For more information on green procurement, see: Contributions to the Global Environment. P. 849

■ Developing Procurement Professionals
In maintaining sound Group management, we uphold our Sustainability Policy to thoroughly establish and enhance our sustainability through efforts that also involve suppliers. We encourage our employees to obtain the Certified Procurement Professional (CPP) qualification, designated by the Japan Management Association, so they can have specialized knowledge in purchasing and procurement. As of fiscal 2021, a total of 74 employees have been certified (Grade A: 30, Grade B: 44), including those transferred in fiscal 2021 and excluding those certified while working in other organizations. Looking ahead, we will continue nurturing human resources in each area to practice procurement activities in accordance with the guidelines of the Japan Management Association. As a result, our stance on the environment in particular has been highly evaluated for setting quantitative targets for multiple related issues. We will continue to work to improve our sustainability performance in the areas of the environment, fair labor and human rights, ethics, and sustainable procurement.

The Procurement and Billing Department engages in environmental protection by appropriately operating their environmental management system, which has been ISO 14001 certified since October 1999. The procurement promotion and strategy sections of the Procurement and Billing Department have also acquired ISO 14001 certification and engages in environmental protection. Every fiscal year, employees responsible for activities as core members are required to participate in ISO 14001 internal auditor training, and four employees took part in fiscal 2021. Along with this training, we provided video training in fiscal 2022 on the outline of ISO 14001 and our environmental protection activities as an organization so that all employees in the department can actively participate in protecting the environment.

■ UK Modern Slavery Act Statement
The NTT Communications Group had been disclosing its statement on slave labor and human trafficking in accordance with the UK Modern Slavery Act 2015. Due to the closure of our London branch on March 31, 2021, the Group is no longer subject to the disclosure of statements under this act. However, we will continue to build honest and sustainable relationships with a wide range of suppliers in Japan and overseas, procure quality services and products in an economical and timely manner, cooperate with suppliers to prevent slave labor and human trafficking, and continue to promote and strengthen our activities based on the Guiding Principles on Business and Human Rights.

For more information on human rights efforts in the value chain, see: Governance. P. 102

■ Enhanced Value Chain Partnerships
Rising public expectations for sustainability activities that also encompass the supply chain have increased the importance of companies knowing the status of their suppliers’ sustainability activities and disclosing that information to clients. Since fiscal 2018, we have registered supply chain information with EcoVadis. We have also been proactively disclosing information to our clients and to companies considering doing business with us. We received a Silver rating in 2022 as a result. Our stance on the environment in particular was highly evaluated for setting quantitative targets for multiple related issues. We will continue to work to improve our sustainability performance in the areas of the environment, fair labor and human rights, ethics, and sustainable procurement.

Disclosure of Supply Chain through EcoVadis
The NTT Communications Group will conduct procurement activities in accordance with the NTT Communications Corporation Guidelines for Sustainability in Supply Chain, (IV. 7. Responsibly procure minerals and carry out due diligence ). The response to conflict minerals by major suppliers is confirmed by conducting a questionnaire survey aimed at checking the operational status of the NTT Communications Corporation Guidelines for Sustainability in Supply Chain.
which is responsible for billing and collection of Companywide charges, to create an environmentally sound society in a shared effort by the entire Procurement and Billing Department.

For more information, see: Acquiring ISO 14001 Certification.

Enhance Stakeholder Engagement

Our Approach to Stakeholder Engagement

Our stakeholder relationships are extremely important for the NTT Communications Group in maintaining sustainable business operations. As part of our efforts to disclose information on sustainability, we have categorized our stakeholder engagement from the perspectives of required information, information that should be shared, and communication media. In addition to this report, we will engage with our stakeholders through our website, various events, and surveys.

[ NTT Communications Stakeholders ]
Ongoing Customer Satisfaction Surveys

In order to remain the service provider of choice for customers around the world, daily contact with customers cannot be limited to sales personnel. All employees consider customer interaction as a top priority and make every effort to increase customer satisfaction through innovative services and daily improvement efforts. One such initiative is the annual VOC survey on customer satisfaction. We take the comments seriously and are working diligently to make improvements.

In fiscal 2021, we conducted the VOC survey to understand customer trends and challenges in addressing social issues through the use of ICT (including carbon neutrality, flexible and hybrid workstyles, and protecting personal information), in addition to the level of overall satisfaction with NTT Communications as well as its service and sales activities. We also received responses from many small and medium enterprise customers (several hundred more than the actual results in fiscal 2020), which enabled us to accurately grasp business strategies and trends across a wide range of customer segments.

Looking ahead, we will continue to pay close attention to what our customers have to say as we strive to make permanent improvements to ensure their satisfaction.

Society has entrusted us with diverse responsibilities to fulfill through our operations, from developing products and services that address social issues to protecting the environment and fostering a corporate culture that respects fairness and diversity. We encourage strict adherence to various guidelines in our corporate activities in order to continue fulfilling our social mission in each of the Priority Areas defined under our Sustainability Policy.

### Guidelines for Diverse Business Activities

Society has entrusted us with diverse responsibilities to fulfill through our operations, from developing products and services that address social issues to protecting the environment and fostering a corporate culture that respects fairness and diversity. We encourage strict adherence to various guidelines in our corporate activities in order to continue fulfilling our social mission in each of the Priority Areas defined under our Sustainability Policy.

To address information security issues that are growing in sophistication and severity due to social trends such as advances in the remote world, we will continuously strengthen security governance and our cyber security measures. We are conducting information security audits and implementing cyber security measures in accordance with the ISO/IEC 27001 international standard for information security management systems to reinforce its governance across the Group. As ICT professionals, we will also focus on establishing environments that prevent the occurrence of personal information leakage by developing human resources capable of maintaining a seamless framework across information and operational technologies.

We are continuously strengthening our information security, including reinforcing our ongoing security management and appropriately managing personal information. In fiscal 2021, we achieved our goal of zero serious incidents, and we will continue to strengthen our efforts to maintain this level of success. From the viewpoint of security enhancement, we worked on establishing a zero-trust network by completing the introduction of Endpoint Detection and Response (EDR) into all NTT Communications Group companies by the end of June 2021 and began deploying multilayer defense solutions such as NDR and UEBA. Furthermore, we held a Security Committee meeting to strengthen and implement security governance. In fiscal 2022, we will link our IT/OT asset management system with our network asset management system.

In fiscal 2021, there were no serious personal information leaks. To ensure proper management of personal information, we revised our internal regulations in fiscal 2021 in light of the revision of Japan’s Personal Information Protection Law. Going forward, we will continue to explore the creation of an effective mechanism to ensure proper disposal and management of confidential information.

The NTT Communications Security Declaration has been our basic policy for conducting business based on our belief that adhering to strict security management standards will lead to improving security and delivering benefit to our customers.

**NTT Communications Security Declaration**

At NTT Communications, we believe that our most important mission is to provide our customers with services which they can use with the assurance that their critical information is being protected and to contribute to improving the security of our customers. We view security as the single most important issue to be addressed in providing services, and we pledge to work together with our customers to provide the best in security for their needs. To achieve this end, we do our utmost to ensure security throughout all aspects of the value chain, from the development of technologies and services to the construction and operation of systems. As ICT professionals, all of us at NTT Communications are committed to improving our capabilities to respond to security issues.

**Three Resolutions**

1. We regard security as our top priority in providing services to our customers, and we will do our utmost to enhance their security.
2. As an ICT solution partner entrusted with our customers’ vital information, we will work with them at all times to ensure their security.
3. Business partners and contract employees are also important supporting members of NTT Communications. We will therefore collectively strive to ensure our own security.
Protection of Customer Information and Personal Information

We protect customer personal information in compliance with the relevant laws and regulations as well as guidelines published by the Ministry of Internal Affairs and Communications, operating under an effective system of information management to stringently implement our Customer Information Protection Rules, which define the basic elements of protecting customer information and personal data. When subcontracting the handling of customer personal information, we select subcontractors that meet the required standards.

We have been operating since 2002 under the ISMS certification**, which is primarily for our corporate sales and maintenance divisions, and since 2004 under the PrivacyMark certification*. In response to the revised Personal Information Protection Law that came into effect in April 2022, we have revised our internal regulations to strengthen our operations, including lifecycle management of customer information. With regard to raising employee awareness, we are taking actions such as conducting annual training sessions for all directors, employees, and partner employees. With regard to GDPR, we had been operating under the EU Customer Personal Information Management Guidelines, which stipulate the handling of personal information in the EU. We have also reviewed the terms and conditions of our contracts with business partners following the release of the revised standard contractual clauses by the European Commission, which apply to the transferred personal data from within the EU to outside the region. In addition, in fiscal 2022, we took the opportunity of becoming a member of the new DOCOMO Group to introduce the Privacy Impact Assessment System (PIA System) to ensure appropriate use of personal data based on the Behavioral Principles of the NTT DOCOMO Personal Data Charter, and we implemented and started operating a pre-assessment function to give full consideration to customer privacy.

We continue to protect our customers’ information and personal data so that they can use our services without concern.

---

*1 A screening and certification system for assessing whether an information security management system conforms to JIS Q 27001 [ISO/IEC 27001] standards.
*2 A registered trademark granted for use by companies that have been certified by the Japan Information Processing Development Corporation as having established a system for appropriately protecting personal information in compliance with Japanese Industrial Standard JIS Q 15001. It meets the required standards.

Raising Workplace Awareness and Providing Thorough Training

We have consistently pursued our initiatives by positioning “Continuously strengthening information security” as a key item in the Priority Area of “Governance” under our Sustainability Policy and by designating it as a main initiative. These encompass a wide range of activities such as strengthening the reliability of our information handling processes, obtaining and maintaining ISMS certification, and conducting security surveys. We proactively provide training for employees in order to raise workplace awareness as a critical responsibility for an ICT enterprise.

In fiscal 2021, we bolstered our training program for each area of operations and improved safety by indicating the specific security measures that should be taken into consideration. As an entity working to sustain a safe and secure networked society, NTT Communications will accelerate the pace of its ongoing initiatives, including those at Group companies.

We set common targets on information security management for our operations in Japan and overseas, based on the requirements of ISO/IEC 27001. Specifically, we implement the following measures under the leadership of the chief information security officer (CISO): formulate rules and standards and educate all employees to raise their awareness, draw up and implement Companywide information security policies, monitor compliance with information security regulations and take any necessary corrective action, and ensure a unified response to information security incidents.

In fiscal 2021, we shifted CSIRT operations to remote work in advance under the impact of the pandemic, and we also expanded its scope in terms of maintenance and service infrastructure networks to bolster the security measures of the NTT Communications Group as a whole by developing a seamless framework across information and operational technologies. In response to the security incident we experienced in 2020, involving unauthorized access to the SSL-VPN, we continued to take action to prevent a recurrence, which included moving up a vulnerability assessment to an earlier stage of development, documenting management based on the level of confidentiality, reviewing the remote access environment, introducing User and Entity Behavior Analytics, and identifying vulnerabilities by a Red Team (ethical hackers). We achieved the objectives of our plan for developing advanced security specialists by jointly operating a remote training program with N.F. Laboratories, Inc.

As of March 2022, eight companies in Japan have obtained external ISMS certification for their information security management systems. Eight companies that primarily handle personal information entrusted by customers have obtained PrivacyMark accreditation in recognition of their systems for protecting personal information.
