Message from the President & CEO

We will play our part in building a strong and vibrant society through social and industrial DX to realize a sustainable future.

Toru Maruoka

Representative Member of the Board
President & CEO
NTT Communications Corporation

A year has passed since NTT Communications, NTT DOCOMO, and NTT COMWARE integrated our enterprise businesses under the new DOCOMO Group and launched our “docomo business” brand. During that time, we witnessed dramatic social transformations, such as increased geopolitical risks, a transition to the new normal in the wake of the COVID-19 pandemic, and soaring energy prices. The world has entered an era of volatility, uncertainty, complexity, and ambiguity (VUCA), in which the future will be uncertain and difficult to predict.

Under these circumstances, NTT Communications defined its vision for a strong and vibrant society in the 2030s, which simultaneously requires inclusiveness, with everyone playing an active role; sustainability, including sustainable growth; and resilience, to go forward safely and securely. To this end, we will develop ways of resolving social issues by leveraging data, and enhance the flexible adaptability and resilience of society and industry by promoting mobile solutions, cloud computing, and other advanced technologies.

We will continue to advance our Re-connect X business vision as a concrete activity and further strengthen the three areas of ICT Transformation to ensure a safe, secure, and flexible connection, our Smart Data Platform to connect data and value, and Smart World to connect society to the future. We will also contribute to realizing a sustainable future by providing more comprehensive ICT solutions that build on our strengths, including 5G and IoT.

In promoting these businesses, we will continue to engage in green transformation (GX) toward achieving carbon neutrality. In addition, we will fulfill our responsibilities to society, such as respecting human rights, promoting diversity and inclusion, and ensuring thorough compliance. We will also work as “Your Value Partner” as set out in our Sustainability Policy for the purpose of “Changing worlds with you.”
