NTT Communications Enterprise Cloud

Redefining Cloud for the Enterprise

NTT Communications **Global ICT Partner**
Innovative. Reliable. Seamless.

Your needs are unique, and so is your cloud.

NTT Communications Enterprise Cloud is your seamless cloud for the real world: One portal. One contract. One SLA. Supported by advisory, migration, operational, and management services, we give you the ability to create the most functional and successful cloud for your business. This new Infrastructure as a Service (IaaS) offering is a global, virtualized private data center in nine locations across the Asia-Pacific region, Europe and the U.S. and is the world's first private cloud to use software defined networking (SDN), giving you the power to manage your traffic more flexibly and efficiently. The NTT Communications Enterprise Cloud reduces complexity, improving business continuity with end-to-end infrastructure management that is truly enterprise class.

GLOBAL ICT PARTNER

- An Enterprise Cloud that is truly enterprise class

  A full-layer self-manageable virtual private cloud

  Unites SDN and virtual server technology

  Combines NTT Communications' industry-leading global IP network and premier data centers

- Global solutions with global cloud infrastructure

  Seamless cloud service and service linkage between worldwide locations, including global data backup

  Available Enterprise Cloud Data Centers: United States, United Kingdom, Japan, Hong Kong, Singapore, Malaysia, Thailand, and Australia

COST OPTIMIZATION

- Computing resources are pay-per-minute, so you only pay for what you need

- Easily optimize resources even after the start of system operation

- Free-of-charge connection between cloud services and NTT Communications VPN

SECURITY

- Global carrier quality

- Complete lifecycle management of all images

- Dedicated VLANs

- Multiple reporting options

- Rich security menu includes network, web access, application/database, e-mail, and virtual machine security

NTT Communications Enterprise Cloud

SIMPLICITY

- One Customer Portal

  View and manage all of your global services and data on a single, intuitive interface

  View and control real time resource usage

  Easily add, delete, or modify resources as needed

- One Contract

  Enjoy streamlined account management and control your entire global cloud network through a single contract

- One SLA

  One 99.99% uptime SLA for any global instance of Enterprise Cloud

FLEXIBILITY & SCALABILITY

- 100% guaranteed compute resources (CPU 1Ghz unit, memory 1GB unit, storage 50GB unit)

- With SDN, network virtualization and bandwidth on demand are yours

- Hybrid cloud support directly connects Enterprise Cloud to your dedicated servers through the same firewall and network

SUPPORT

- Experienced, dedicated account and service managers to guide you

- Carrier-grade monitoring and operation

- 24x7 direct access to expert technical assistance
