

Unified Collaboration Cloud Solution

We offer a new collaboration infrastructure which overcomes time and location limitations, and is essential to reforming work styles.

To reduce TCO and enable smooth communication

To enable worldwide communication

To introduce tools corresponding to the diverse work styles of their employees

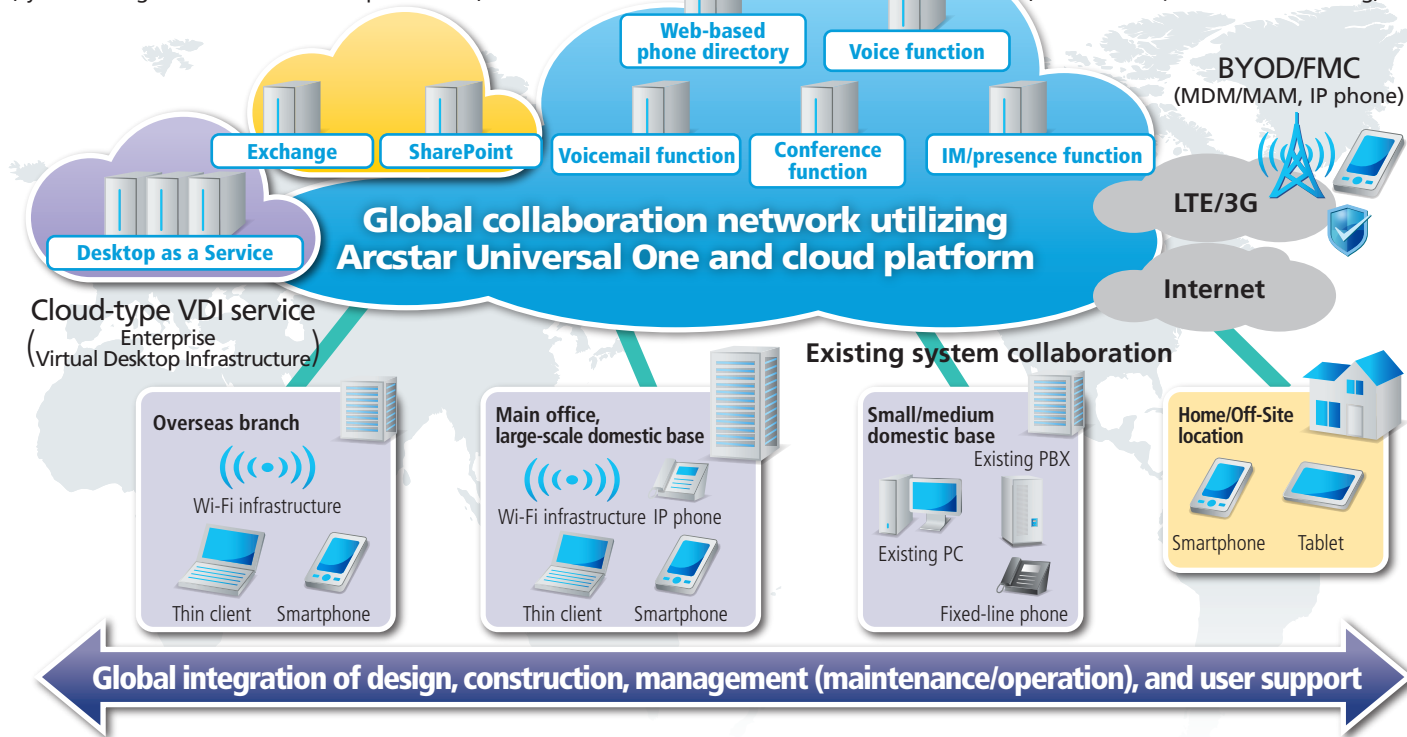

To integrate the company's ICT infrastructure to reduce costs

Cloud-based email / groupware implementation solution (Lync/Exchange/SharePoint on Enterprise Cloud)

Cloud-type UC service (Arcstar UCaaS, Arcstar Conferencing)

Our globally-available cloud services can reform customer's communication infrastructure, and can help customer successfully transform its work style.

Merging email, groupware, information portals, virtual desktops, remote conference service, and unified communication, NTT Communications provides "one-stop" design, implementation, and maintenance.

1 Layered, seamless integration that only a global cloud service provider can offer.

[1] Unified communication solution

- By integrating diverse communication services and networks, we can offer an ideal means of collaboration specifically tailored to meet various usage scenarios.
- We can offer collaboration suite that overcomes location and time limitations through compatibility with smart devices.
- We can also offer a customized approach to meet customer demands, through combination with Microsoft communication infrastructures, existing PBX, integrated ID infrastructures, etc.

[2] Smart device solution

- Smartphone/Tablet utilization (BYOD compatible)
- Security (MDM/MAM)
- 050 IP phone apps and Jabber provide an "anywhere internal line"
- Web-based phone directory, video conferencing, and Web conferencing are utilized for business trips and working at home
- Safe access to GoogleApps, Office 365, and Exchange

[3] Thin client solution

- Thin client/VDI
- Virtual desktop screen transfer will improve device selection and mobility, while enabling safe, efficient telework
- Server type is selectable; Ready-made DaaS or Custom-made.

2 Establish new "collaborative work style" of yours. NTT Communications can help it with our global seamless ICT service that covers planning, design, implementation and operation regardless of it being single or multi-vendor ICT.

3 While supporting your ICT design, our experience and knowledge of work style innovation, acquired through our own case and customer cases, will help your company make concept, improve corporate culture, and design policy and operation as well.

A globally-integrated communication infrastructure creates "One Work Style," "One Collaboration," and "One Company"
