

Award-winning records

2017 MM Research Institute Awards

Received the best Award for Artificial Intelligence Field in Smart Solutions Division. We are humbled to have been named a recipient of a 2017 MM Research Institute Award due to the level of advancement of COTOHA Virtual Assistant in understanding Japanese Language as one of the most difficult languages to analyze with high precision, realizing smooth conversation, as well as having the extensibility in recognizing not only text but also telephone voice and practical interface which can be easily connected to the external systems. We are truly honored by this acknowledgement.

MM Research Institute Award

"MM Research Institute Award" was established by MM Research Institute in 2004 with the aim of becoming a catalyst to encourage ICT field market and industrial development for actively introducing new products to the market, and MM Research Institute honors those companies that work on developing new markets.

Award-winning records
