Asia looks to IT Service Partners to leap on opportunity

Security is the biggest challenge faced by companies managing IT in-house.

MSPs are called on to help across a wide range of areas.

Technology outsourced to MSPs is similarly broad.

Cloud Migration and Managed Infrastructure are the biggest technology projects currently underway.

Six reasons to use MSPs:

1. MSPs can take on the cost of expertise.
2. MSPs can offer a single point of accountability.
3. MSPs can take on the day-to-day operations.
4. MSPs can offer flexibility.
5. MSPs can offer a consistent level of service.
6. MSPs can offer access to new technology.

Most will increase their outsourcing.

Singapore, Malaysia and Hong Kong will increase large-scale outsourcing disproportionately.
