### About NTT Communications Corporation

NTT Communications provides consultancy, architecture, security and cloud services to optimize the information and communications technology (ICT) environments of enterprises. These offerings are backed by the company's worldwide infrastructure, including the leading global tier-1 IP network, the Arcstar Universal One™ VPN network reaching 196 countries/regions, and 140 secure data centers worldwide. NTT Communications' solutions leverage the global resources of NTT Group companies including Dimension Data, NTT DOCOMO and NTT DATA.

# Nexcenter

Providing world-class quality and full support  
Global x Non-stop data center service

Nexcenter

Consistent contracting **worldwide** with the  
ability to distribute workloads globally.

# Quality

Supporting and enhancing customers'  
ICT system quality

# Flexibility

The best options and customized solutions  
for the customer

# Cost-efficiency

Maximizing investment efficiency by minimizing the  
cost of ICT system operations

# 140+

## Data Centers Worldwide

# Value and Merit of Nexcenter

## Facilities and Operations

All NTT Communications' data centers meet our globally consistent Data Center Standards and service quality.

NTT Communications' Data Center Standards consist of more than 300 items. All of our facilities satisfy a rigorous in-house standards checklist. This ensures every data center provides the same high-quality services.

We also employ consistent operational procedures in all of our data centers around the world. Our reliable services based on standards set by international certifications and operational guidelines such as ISO and ITIL.

## Recognition and Awards

NTT Communications has received awards as the No.1 data center provider in Asia for service quality.

## Scalability

Seamless global network and data centers in over 140 locations worldwide.

We have the largest-scale data center and network coverage in the APAC region which bolsters the speed of customers' overseas development.

## Various Outsourcing Options

**A diverse customized menu of facility and operation services.**

We fully support customers' business operations through flexible facility design and technological capabilities including private suites, highly sophisticated security equipment, remote hands service, and server management.

## Nexcenter Connect™

**10Gbps large-volume network connects NTT Communications' Data Centers Worldwide and Enterprise Cloud.**

This service gives more flexible usage to your global ICT resources.

"Nexcenter Connect™ Global": connects major data centers worldwide.

"Nexcenter Connect™ Metro": connects data centers within major areas of each country.

## Reduced Construction and Power Costs

**Our self-designed, self-constructed data centers lower construction costs and energy costs while elevating performance.**

Our space-saving, energy-saving design takes advantage of state-of-the-art technologies to realize cost reductions in building/facility construction and electricity bills. Advanced technologies include free cooling system, cool wall blow type air conditioning system, DCIM, HVDC, Rotary UPS, LED lighting, and more.

## Reduced Network Costs

**Optimization of costs for networks and various ICT solutions.**

Provision of low-cost network service with low latency and fully redundant systems.

Minimization of total costs by bundling various types of ICT management services.

## Reduced Customer System Administration Costs

**Integrated customer portal heightens the efficiency of your business operations.**

Our customer portal offers rich functionality such as data center access application and your facility management to save your operations time and money.

# Business Benefits of Nexcenter

## Business Continuity

### Full Measures for Disaster

We take every disaster control measure such as for earthquakes and floods to reduce effects on your system operations.

### High Availability with Redundant Facilities

Our industry leading SLA for power availability, redundant power supply, air conditioning, and network facilities maximize your system uptime.

### Financial Stability

We receive a top credit rating as a data center provider every year. This financial stability avoids sudden bankruptcy or acquisition by other companies. As a result, there is much less risk to affect your operations into the future.

## Usability

### Global Footprint

Over 140 data centers in major cities of 18 countries on 4 continents ensures we can fulfil your optimum business expansion.

### Safe Operations

Your ICT assets are protected with strong physical security and reliable well-disciplined operations certified by various organizations.

### Flexible Solutions

Customization is available for facilities, operations, and billing systems to optimize your complete solution.

### One-stop Management by Portal Site

Your system management becomes quick and simple with our online business portal offering rich functionality such as data center access application and facility management.

## Global Network

### Low-latency Submarine Cable

Our global submarine cable system offers low-latency and large-capacity data communication between major cities worldwide.

### Deployable Efficient ICT Resource

We offer global network spread in 9 countries and low-cost high capacity network between data centers. You can deploy your ICT resources efficiently and make seamless connection with cloud services to realize flexible data backup and system expansion.

## Cost Performance

### Low Priced Power with Advanced Energy-Saving Facilities

Employing state-of-the-art, highly-efficient, energy-saving facilities, the energy costs are improving continuously and high-quality power can be available at low-cost.

### High-Density Power Racks

You can deploy more servers in less space with our highly efficient cooling. As a result, you can achieve higher IT performance per rack than other data center providers.

### Leverage Financial Strength

With NTT Communications' global mega-purchasing power, we can realize low cost services by purchasing high quality data center facilities, which can reduce your operational cost.
